

**24791-3**

Feb 20 2009

# Update since Neuchatel

- DCI and RDMP merged into single document
- EPC Global spec released, IETF in 'final' stages
- Conformance Requirements for each interface set added
- 2 ad-hoc reviews completed
- Significant content added for RDMP
- OASIS is ARO
- DPWS is in Public Review

# Deltas

- Feb 19<sup>th</sup> version
  - Clearer RDMP conformance requirements
  - More non normative text with examples for service discovery and device metadata
  - References public review version of DPWS v1.1 that was published on Jan 27
  - Firmware Update simplified and tightened
  - Management Service concepts explained and tightened

You will like the Feb 19<sup>th</sup> version better!

# RDMP

- References DPWS
- Two deliverables
  - Standard Spec document
  - WSDLs and XSDs [included separately]
- Sections
  - Device Discovery
  - Device Metadata & Service Discovery
  - Firmware Update Service
  - Management Service
  - Monitoring Service
  - Errors
  - Security
  - Extensibility

# Remaining Work Items

- Including 24791-5 configuration parameters into Management Service
- Security
  - Describe model and usage of model to secure clients and services
- Illustrating extensibility via examples
- Monitoring Service – tighten requirements

# Plan for CD Ballot

- Complete remaining work items
  - Help needed for 24791-5 configuration
- Ad-hoc meeting for March 1<sup>st</sup> week

# Questions

- Do we need to include DPWS specs as collateral?
